

Texas Oil Spill Prevention, Control, and Countermeasure (SPCC) Plan and Compliance

Interested in a Comprehensive and Streamlined Compliance Solution for your Facility?

Eliminate Anxiety with a Comprehensive Plan

Take advantage of ALG's years of hard work to refine and perfect SPCC Plans that can stand up to the toughest critics.

Simplify Compliance with Web-based Digital Workflows

Compliance tasks at your fingertips. Don't get bogged down with time-consuming tasks and rest easy knowing no compliance step will be skipped. Whether you are sitting at your desk or in the field, complete a form, assign an inspection, report a spill, document a cleanup...it is like the personal assistant you always needed.

Resource Limited, does Turnkey sound good to you?

Let ALG ease your burden and update your plan and manage your compliance task calendar and spill reporting.

Quick Reference Guide

A SPCC Plan documenting oil storage overfill protection, secondary containment, operating procedures, periodic inspections, spill mitigation and reporting procedures and employee training is required for any facility that has a total above ground oil storage capacity greater than 1,320 gallons in containers 55-gallons or more and/or a total underground oil storage tank capacity greater than 42,000 gallons, and the facility could potentially discharge oil into navigable waters in quantities that may be harmful.

Oil of any type and in any form is covered, including but not limited to petroleum, fuel oil, sludge, oil refuse, oil mixed with wastes, fats, animal/fish oils or greases, vegetable oils, mineral oils and synthetic oils.

EPA recently revised the definition of “Waters of the United States”, clarifying the meaning of traditional navigable waters. This rule was published on April 21, 2020 and became effective on June 22, 2020.

SPCC Plans must be reviewed every 5 years and be updated each time changes are made at the facility. Remember to consider Hurricane Harvey's 25-year, 24-hour rainfall for secondary containment freeboard.

We're here to help.

Our knowledgeable and resourceful PEs have years of experience helping facilities to comply with SPCC regulations. If you need help with these requirements or simply have general questions about SPCC Plans, please give us a call or visit our website: www.alccorp.com
